

How to ITH Magnetic fold-over bookmark

SPECIAL NOTES:
This PDF may not show exactly the same Magnetic fold-over bookmark you are making but the steps are the same

Materials:
Medium- heavy weight cut away Stabilizer
(1) piece of vinyl roughly 4 ½" x 4 ½"
(2) pieces of olyfun, or similar very thin non-fray fabric, also roughly 2 ½" x 4 ½"
Small amount of e6000 glue
(2) neodymium magnet (approx. 2mm x 20mm)

Before we get start stitching, let's take a look at the Color Stop PDF that came in your zip file.

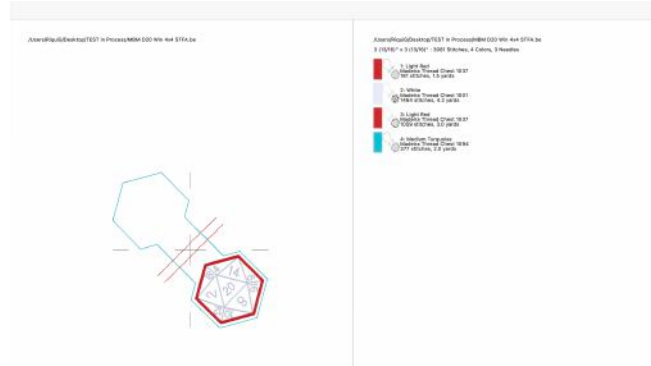

Step 1: Mark your magnets. You'll want to mark them, so you know which sides attract and which sides repel. I let them stick together then mark the outside of that stack on both sides.

Step 2: Hoop a piece of medium-heavy cutaway .

Step 3: Run Color Stop 1 on your blank stabilizer only. This is going to give you the die line, so you know where in the hoop to place your vinyl.

Step 4: Place your vinyl. DON'T hoop it, FLOAT it! You can use a little 505 spray to hold it in place or a little blue painters tape works well too. Make sure your vinyl covers up your die line completely.

Step 5: Run all of the design element color stops, (this will be all but the last stop)

The Magnetic fold-over bookmark in this PDF has 4 Color stops, yours may have more, but that's ok. This PDF will work for any STFA Magnetic fold-over bookmark.

The first color stop is the Die line that will show you where to place your vinyl the thread color is the suggested vinyl color. You're going to run this before placing your vinyl.

The next few colors are going to be your design elements.

The last stop you'll add you're backing and then stitch the final stop. This stop will usually be a weird color, but you should stitch it in a color to match the color stitched right before it on the PDF. It's a weird color on the file to force the machine to stop.

Step 6: Now take your hoop off of the machine but **DO NOT** unhoop your Magnetic fold-over bookmark. Flip your hoop over and tape your back pieces of olyfun to the hoop. You'll use the die lines for placement. Make sure you secure this to your hoop really well, because... Gravity! YES, You want a gap.

Run the last color stop. This will stitch the olyfun backing on. No, the magnet is not there. Call me paranoid but I prefer to do the magnet part where it's not near the machine.

Step 7: I use a rotary cutter and ruler to rough cut the outside, so I don't have so much flopping around on the final cut.

Now it's time to get your cut on with some super sharp scissors.

You want to cut close to the final stitching, but not TOO Close, usually about 1/8" away does the trick.

Step 8: Now, grab your magnets and put a little dab of e6000 glue **on THE SIDES I MARKED.** Just slip your magnets right inside with the glue attaching to the vinyl side of your magnetic fold-over bookmark.

Step 9: Use a tiny bit more of the glue to close the opening on both sides of the gap. Wipe off any excess glue and let things dry.

Find your favorite book and enjoy your new bookmark.
